EDUCATION

BTECH IN COMPUTER SCIENCE.

PES UNIVERSITY.

SNBP INTERNATIONAL SCHOOL

PRESIDENCY SCHOOL BANGALORE SOUTH

OCTOBER 2024-JUNE 2028

7.93 cgpa(3rd semester)

2022-2024

12th : 89%

10th :95%

PROJECTS

Quantum-Resilient Digital Identity System – CCNS Lab

Team Lead | Oct 2025–Present

- Leading a team of 5 to build a quantum-resilient digital identity system for secure e-governance.
- Implemented post quantum cryptography to protect identities from quantum attacks.
- Integrated blockchain storage for immutable and verifiable identity records.
- **Designed secure authentication workflows using threat-modeling principles.**

Unravel AI – Generative AI Hackathon Project

- Built an AI system to analyze and simplify complex travel documents.
- Implemented multilingual summarization and translation features.
- Added audio explanations to improve accessibility and user experience.

Student–Alumni Mentorship Platform (Web Development Project) (In Progress)

- Developing a web platform connecting students with alumni for interview preparation and career guidance.
- Enables mentorship, experience sharing, and placement preparation resources.
- Built under the guidance of the college placement cell.

EXPERIENCE

Software Engineering Virtual Intern – Forage.

July-2025

- Completed a Forage software engineering job simulation, building a React web app, a microservice, and a mobile friendly feature.
- Gained hands on experience in full stack development, system design basics, and real world problem solving

SKILLS

Programming: C, Python, JavaScript

Web Development: MERN Stack (MongoDB, Express.js, React.js, Node.js), REST APIs

Tools & Platforms: Linux, Git, GitHub

Security & Systems: Cybersecurity Fundamentals, Network Security Basics, Authentication & Authorization

Other: Blockchain Fundamentals, Introductory Post Quantum Cryptography, Generative AI & NLP basics
